

Barrel Clamp

Barrel Clamp - Known as "Barrel Clamp", this hydraulic attachment is actually utilized on lift trucks in order to clutch objects which you want to transport using the forklift. Usually, they're utilized in order to barrels, handle kegs, and paper rolls, along with several barrel clamp designs having the ability to revolve the load. Like for instance, the rotate function permits the individual operating the forklift to put in a vertically stored paper into the horizontal intake of a printing press.
