

## JLG Forklift Part

JLG Forklift Part - In the late 1960's John L. Grove, with his wife Cora started out on a cross country trip in their RV. Newly retired, after spending many years working with his brother to assemble their crane company into an market leader, John had no idea that important trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision materials handling equipment was the end result of a road trip.

All through their trip, John reacquainted himself with former business associates along the way. In combination with these conversations and a noteworthy event; two workers had been unfortunately electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered a substantial market for a product that could quickly and safely elevate individuals in the air to accomplish maintenance and other building services.

Upon returning from their travels, John formed a joint venture with two friends and acquired a metal fabrication company in McConnellsburg, Pennsylvania. In 1970, starting operations with a crew of twenty staff, they created and sold the first JLG aerial work platform. The company incorporates many of the simple design elements of that original lift into current models.

JLG lift trucks have come a long way from the time when Mr. John L. Grove came back to town from his cross-country road trip and since the initial aerial work platform debuted on the market. Today, the business proudly continues to expand itself into different markets worldwide and develops new products to make sure consumers are capable of being more effective and perform in the workplace within a safer environment.
